BIG DATA. BIGGER OPPORTUNITY.

A guide to building your career in Analytics

PROGRAM BENEFITS

POST GRADUATE PROGRAM IN BUSINESS ANALYTICS

1 INDUSTRY RELEVANT CURRICULUM

The curriculum of PGP-BA covers the basics of management and deep dives into analytics. The academic exhaustiveness of the program is complemented by hands on exposure on tools and technologies such as SAS and industry lectures delivered by senior executives from leading analytics organizations.

2 INNOVATE PEDAGOGY

The program creates a blended learning environment that causes minimal disruption to work schedule. The classroom sessions are followed up by online lectures that keep your learning continuous and self-paced. Good education should be forever and hence, the candidates in our program can access the content online (lectures, pre-readings, assignments) even after they have graduated.

3 HANDS ON EXPOSURE

An integral part of learning experience in PGP-BA is the virtual lab wherein the candidates get hands on exposure and build skills in tools and technologies such as SAS, Tableau, etc.

4 CORPORATE PARTNERS

The corporate partners of the program include leading analytical organizations and support the program in curriculum design, student driven projects, industry case studies and guest sessions by their senior executives.

ANALYTICS COMPANIES IN INDIA

Evalueserve, one of India's foremost knowledge companies, has identified analytics as its future area of growth and is expanding its global footprint with offices in US, Chile, Romania and China.

Fractal analytics, which has its offices in US and India, is set to double their workforce in the next 12 months.

Mu Sigma, one of India's analytics success stories, was valued at 1 Billion USD in its Feb 2013 round of funding wherein it raised investments from Mastercard, Fidelity and others.

At a time when growth in IT services is tapering, 'Analytics' has been an unprecedented area of growth for all IT majors in India.
