PROGRAM BENEFITS

POST GRADUATE PROGRAM IN BUSINESS ANALYTICS

1 INDUSTRY RELEVANT CURRICULUM

The curriculum of PGP-BA covers the basics of management and deep dives into analytics. The academic exhaustiveness of the program is complemented by hands on exposure on tools and technologies such as SAS and industry lectures delivered by senior executives from leading analytics organizations.

2 INNOVATE PEDAGOGY

The program creates a blended learning environment that causes minimal disruption to work schedule. The classroom sessions are followed up by online lectures that keep your learning continuous and self-paced. Good education should be forever and hence, the candidates in our program can access the content online (lectures, pre-readings, assignments) even after they have graduated.

3 HANDS ON EXPOSURE

An integral part of learning experience in PGP-BA is the virtual lab wherein the candidates get hands on exposure and build skills in tools and technologies such as SAS, Tableau, etc.

4 CORPORATE PARTNERS

The corporate partners of the program include leading analytical organizations and support the program in curriculum design, student driven projects, industry case studies and guest sessions by their senior executives.

5 GREAT LAKES ADVANTAGE

GREAT LAKES
INSTITUTE OF MANAGEMENT

Great Lakes is one of the premier business schools in the country and has been consistently ranked within the top 15 in the country. The analytics program by Great Lakes would give the candidates an opportunity with the best of the employers and access to the Great Lakes alumni base worldwide.

ADMISSION DETAILS

POST GRADUATE PROGRAM IN BUSINESS ANALYTICS

ELIGIBILITY

Candidates meeting the following conditions are eligible for pursuing the PGP-BA program:

Work Experience

Minimum two years of experience at the time of submitting the application

Education:

Should at least have Bachelor's degree in engineering or other relevant graduation such as Mathematics, Statistics, Science, etc.

COURSE FEE

The fee for the program is Rs. 300,000 inclusive of Service Tax

This includes the following:

- Admission Fee
- Tuition Fee
- Learning Material
- Lunch during days of classes

PROCESS

1 All the applicants would need to take an online test. The admission committee would shortlist candidates based on the profile and evaluation of the test.

2 The shortlisted candidates would then be called for interviews. Interviews may be conducted in person or over video/tele conferencing.

3 The admissions will be conducted on a rolling basis and the admission process shall be closed once the requisite number of candidates have taken admission into the program.
